

Amendments to the Claims:

This listing of the claims will replace all prior versions and listings of the claims in this application:

Listing of the Claims:

1. (Canceled).
2. (Canceled).

Claims 3 – 11. (Canceled).

12. (Currently Amended) A multilayer stretch film comprising:

~~The stretch film as claimed in claim 1, wherein the a~~ cling layer further comprises comprising a heterogeneously branched ultra low density polyethylene and a plastomer;

a non-cling layer comprising a copolymer of propylene and ethylene
wherein said copolymer has an ethylene content of about 1% by weight to about
10% by weight; and

at least one core layer comprising from about 97.0-99.9% by weight linear low
density polyethylene and from about 0.01-3.0% by weight low density polyethylene.

13. (Canceled).

Claims 14-23. (Canceled).

24. (Currently Amended) A multilayer stretch wrap film comprising:

at least one first layer comprising a heterogeneously branched ultra low
density polyethylene and from about 15% by weight to about 40% by weight of a
plastomer;

at least one second layer comprising a polypropylene;

at least one third layer comprising a mixture of a linear low density polyethylene and a low density polyethylene;

wherein said third layer is disposed between said first layer and said second layer.

25. (Canceled).

26. (Currently Amended) The film of claim 25 24, said plastomer being an ethylene copolymerized with a C₃-C₁₀ α -olefin.

27. (Previously Presented) The film of claim 26, said plastomer being an ethylene copolymerized with a C₈ α -olefin.

28. (Previously Presented) The film of claim 27, said plastomer having an unstretched cling of about 250 g and a 200% stretch cling of about 66 g.

29. (Currently Amended) The film of claim 25 24, said plastomer having a density of from about 0.850 to about 0.900 g/cm³.

30. (Currently Amended) The film of claim 25 24, said plastomer having a melt index of from about 1.0 to about 20.0 g/10 min.

31. (Currently Amended) The film of claim 24, A multilayer stretch wrap film comprising:

at least one first layer comprising a heterogeneously branched ultra low density polyethylene and said first layer further comprising about 15% by weight of a plastomer;

at least one second layer comprising a polypropylene;

at least one third layer comprising a mixture of a linear low density polyethylene and a low density polyethylene;

wherein said third layer is disposed between said first layer and said second layer.

32. (Previously Presented) The film of claim 31, said plastomer being an ethylene copolymerized with a C₈-C₁₀ α -olefin.

33. (Previously Presented) The film of claim 32, said plastomer being an ethylene copolymerized with a C₈ α -olefin.

34. (Previously Presented) The film of claim 33, said plastomer having an unstretched cling of about 250 g and a 200% stretch cling of about 66 g.

35. (Previously Presented) The film of claim 31, said plastomer having a density of from about 0.850 to about 0.900 g/cm³.

36. (Previously Presented) The film of claim 31, said plastomer having a melt index of from about 1.0 to about 20.0 g/10 min.

37. (Canceled).

Claims 38-60. (Canceled).
